

Fear of Recurrence

When cancer comes back after treatment and after a period when cancer was not found in your body, it's called a recurrence. Most cancer survivors experience a fear of recurrence.

TRY THIS

Adjust to a new normal. You may find yourself making changes in the ways you do things.

Be informed. Ask your doctor for a list of common signs of recurrence.

Join a peer group. Find support and useful ideas from others that might help you.

Practice Mindfulness and Relaxation

Cancer and its treatment can be stressful—for you and your caregivers. Practicing mindfulness and relaxation can help calm your mind, reduce stress, and sharpen your ability to focus.

TRY THIS

Enjoy simple pleasures. Enjoy your favorite food, or listen to your favorite song.

Take a walk outside. Walk slowly. Notice what you see, hear, and smell.

Practice deep conscious breathing. Sit in a quiet spot for a few minutes. Notice your breath.

Be Active

Exercise is not only safe and possible during cancer treatment, but it can improve how well you function physically and your quality of life.

TRY THIS

Do physical activity. Being physically active for even just a few minutes a day is helpful.

Begin with warm-up exercises. Start slowly and warm up for at least 2 to 3 minutes.
